

Brilian Ade Putra

AI Engineer / Generative AI, RAG & LLM Systems · Engineer/Specialist visa, English-fluent

Tokyo, Japan · +81 70-8535-6513 · brilianadeputra@gmail.com · [linkedin/brilianap](https://www.linkedin.com/in/brilianap) · [github/BillyMRX1](https://github.com/BillyMRX1) · billymr.com

SUMMARY

AI Engineer with 4 years of production experience across mobile, full-stack, and Generative AI. Currently building RAG-based and agentic systems on Azure at Honda's AdvanceAI Strategy division in Tokyo, after shipping mobile products to 2M+ users across Indonesia.

EXPERIENCE

Honda Motor Co., Ltd. — AdvanceAI Strategy

Tokyo, Japan

AI Engineer

Mar 2025 – Present

- Built and deployed **Kakehashi**, a real-time meeting transcription/translation tool (Azure Speech, Translation, OpenAI, Container Apps); adopted by AdvanceAI Strategy and rolling out to other Honda departments
- Designed an **AI Reverse Engineering** web app that uses Azure OpenAI to ingest source-code archives and generate full project documentation or framework-migration specs (Next.js, FastAPI)
- Built a **Requirement Generator** converting meeting transcripts into structured requirement specs, accelerating engineering planning cycles (Next.js, FastAPI, Azure OpenAI)
- Shipped a RAG document analysis pilot for Honda's engineering and legal teams over ~5K multi-format technical documents (Azure OpenAI, Azure AI Search, FastAPI); also built an internal MCP server and CLI to accelerate AdvanceAI team workflows
- Benchmarked Microsoft Copilot's RAG pipeline across 5 retrieval/chunking/embedding configurations; report adopted into Honda's enterprise AI automation roadmap

MMS Group Indonesia

Jakarta, Indonesia

Mobile Developer

Sep 2023 – Jan 2025

- Built and maintained MMSGI Chat, a cross-platform messaging app serving 1,000+ employees across Android, iOS, web, and desktop using React Native and Rocket.Chat
- Led a 5-person external vendor team delivering the MMSGI Super App, a multi-feature React Native enterprise platform
- Set up GitHub Actions CI/CD pipelines across all company projects, cutting deployment time by 50%

Gravel

Jakarta, Indonesia

Android Engineer

Oct 2022 – Sep 2023

- Shipped two Android apps (Gravel and Gravel Dulur) in Kotlin and Jetpack Compose, from development through Play Store release
- Built a shared design system and component library that reduced development time on future projects by 20%
- Designed and shipped Surveyor and Home Service features from scratch in Kotlin and Jetpack Compose, launching two new product revenue lines for the business

Vision+

Jakarta, Indonesia

Android Developer

Sep 2021 – Oct 2022

- Led a 5-person team integrating Dolby Vision and Atmos in Kotlin and ExoPlayer, making Vision+ Indonesia's first OTT platform to support these technologies
- Reduced cold start time from ~20s to under 2s through memory optimization and performance profiling in Kotlin; improved crash-free rate from 75% to 90% (Firebase Crashlytics)

PROJECTS

Amazon Scraper MCP · Node.js, MCP

[GitHub](#)

- Model Context Protocol server scraping Amazon product data across 20 global domains for LLM agents

PDF RAG System · Python, LangChain, OpenAI

[GitHub](#)

- End-to-end RAG pipeline for Q&A over PDFs with multi-file ingestion and chunked context

Islam Time · Kotlin, Jetpack Compose, MVVM

[Play Store](#)

- Android app for prayer schedules and Qibla direction, independently shipped to Google Play

TECHNICAL SKILLS

AI / ML: Azure OpenAI, Azure AI Search, LangChain, RAG, MCP, Whisper, PyTorch, OpenCV, MediaPipe

Languages: Python, TypeScript, Kotlin, Dart

Web / Backend: Next.js, React, FastAPI, Express.js, Node.js

Mobile: Jetpack Compose, React Native, Flutter, Kotlin Multiplatform

Cloud / Data: Azure (OpenAI, AI Search, Container Apps, Speech, Translation), AWS Bedrock, PostgreSQL, MongoDB, Firebase

Tools & Languages: GitHub Actions, GitLab CI, Docker · English (Fluent)

EDUCATION

Brawijaya University · Bachelor of Computer Science, GPA 3.65/4.00 Malang, Indonesia · Aug 2018 – Jul 2022
