SUMMARY

AI Application Engineer with nearly five years of software engineering experience across generative AI, full-stack and backend systems, and mobile products. Most recently worked in Honda's AdvanceAI Strategy division, owning internal AI applications end-to-end from Next.js interfaces and FastAPI services to Azure OpenAI, Azure Speech, Azure Translator, RAG, and MCP integrations. Previously shipped production mobile applications for enterprise and consumer users in Indonesia.

EXPERIENCE

Honda Motor Co., Ltd.

Tokyo, Japan

AI Engineer

Mar 2025 – Jun 2026

- Owned the end-to-end development of internal AI web applications, designing and implementing Next.js frontends, building FastAPI backend services, and integrating Azure OpenAI, Azure Speech, Azure Translator, and the OpenAI API
- Designed and built an internal multilingual meeting web application using Next.js and FastAPI, integrating Azure Speech and Azure Translator for live transcription and translation
- Implemented editable transcripts, AI-generated summaries through Azure OpenAI, and document export; piloted the solution within a 40-person department to help international employees follow meetings conducted primarily in Japanese
- Designed and built an internal AI-assisted code analysis application using Next.js, FastAPI, and Azure OpenAI to generate technical documentation and software migration specifications
- Built an internal Model Context Protocol (MCP) server and CLI to connect developer tooling with internal AI services and streamline engineering workflows

MMS Group Indonesia

Jakarta, Indonesia

Mobile Developer

Sep 2023 – Jan 2025

- Built and maintained MMSGI Chat, a cross-platform employee application serving 1,000+ users across Android, iOS, web, and desktop using React Native and Rocket.Chat
- Set up GitHub Actions CI/CD pipelines across all company projects, cutting deployment time by 50%

Gravel

Jakarta, Indonesia

Android Engineer

Oct 2022 – Sep 2023

- Shipped two production Android applications (Gravel and Gravel Duler) in Kotlin and Jetpack Compose, from development through Play Store release
- Built a shared design system that reduced future development time by 20%, and shipped Surveyor and Home Service features that launched two new product revenue lines

Vision+

Jakarta, Indonesia

Android Developer

Sep 2021 – Oct 2022

- Led a 5-person team integrating Dolby Vision and Atmos in Kotlin and ExoPlayer, making Vision+ Indonesia's first OTT platform to support these technologies
- Reduced Android cold start time from ~20s to under 2s through memory optimization and performance profiling; improved crash-free rate from 75% to 90% with Firebase Crashlytics

PROJECTS

Amazon Scraper MCP · Node.js, MCP

[GitHub](#)

- Model Context Protocol server scraping Amazon product data across 20 global domains for LLM agents

PDF RAG System · Python, LangChain, OpenAI

[GitHub](#)

- End-to-end RAG pipeline for Q&A over PDFs with multi-file ingestion and chunked context

Islam Time · Kotlin, Jetpack Compose, MVVM

[Play Store](#)

- Android app for prayer schedules and Qibla direction, independently designed and shipped to Google Play

TECHNICAL SKILLS

AI & Backend: Python, FastAPI, Azure OpenAI, OpenAI API, RAG, MCP, LangChain

Frontend & Mobile: TypeScript, Next.js, React, React Native, Kotlin, Jetpack Compose

Cloud & DevOps: Azure Container Apps, Azure Speech, Azure Translator, AWS Bedrock, Docker, GitHub Actions, GitLab CI

Data: PostgreSQL, MongoDB, Firebase

EDUCATION

Brawijaya University · Bachelor of Computer Science, GPA 3.65/4.00 Malang, Indonesia · Aug 2018 – Jul 2022
